Reptile and amphibian medicines and vitamins

This leaflet describes Beaphar medicines and vitamin supplements for reptiles and amphibians. These effective products have been developed to control or avoid the most common health problems.

Beaphar medicines are especially useful because:

- 1: They are readily available 'over the counter'.
- 2: They have been specially developed for the reptile market.
- 3: They are effective and easy to use.

It is important to isolate sick animals and to place them in a warm place away from draughts. Fresh water and fresh food are also of great benefit.

To meet the requirement for vitamins and minerals, there are six new vitamin pastes available. Each formulation is unique, and uses the most up-to-date research to give the best health benefits. There are also long-established favorites like liquid Turtle-Vit, and the powdered supplement Reptile Minerals.

beaphar
Wormer**Wormer small**

Suitable for:
Reptiles and amphibians
between 25g and 250g
in weight.

Product data:

Art. no. : 18583
