Function table

<p>Aloë Vera</p>	<p>Aloë Vera protects against loss of moisture, so keeping the skin looking young and feeling soft. It also reduces inflammation and swelling, and enhances recovery from minor burns. It helps to stimulate the healing of superficial wounds, cuts and grazes, and alleviates irritation from insect bites. It contains allantoin, a substance that aids in cell proliferation, so aiding skin regeneration and wound closure.</p>
<p>Birch-tar Oil</p>	<p>Birch tar is a well known ingredient in folk medicine, used for the external treatment of skin diseases. It contains, amongst other things, guaiacol for the softening of the skin, and cresol for disinfection. Birch tar oil also contains oils that replenish the natural oils missing in dry skin.</p>
<p>Calendula oil</p>	<p>Calendula (Calendula officinalis) has been shown to possess beneficial effects in wound healing, minor burns, grazes, in the alleviation of insect bites, in epithelialization, and it has antiseptic and antifungal properties. It is recommended for use where there are bruises, inflammation, wounds, strains and scalds, therefore.</p>
<p>MSM (Methyl Sulphonyl Methane)</p>	<p>MSM (Methyl Sulphonyl Methane), is a natural hypo-allergenic form of sulphur, which can be found in dairy products, vegetables and fruit. It strengthens the hair-root and makes the coat soft and shiny. MSM strengthens natural resistance and promotes cell regrowth. MSM also combats the effects of external allergens. Formulated as a shampoo, MSM comes directly into contact with the coat and skin, and works where needed.</p>
<p>Salicylic acid</p>	<p>Scientific research has proven that salicylic acid helps balance the water content of skin, so reducing hardening and scaling, and the process of dandruff formation.</p>
